

Lumi-Curve Light

Lumi-Curve has been created to provide a very flexible and powerful light type to solve lighting challenges that traditional 'fixed-shape' light sources cannot solve. Put simply, Lumi-Curve lets you draw a 'curve' with a controllable gradient each side of the line. A huge variety of lighting effects are possible using Lumi-Curve.

Here are the key settings for a Lumi-Curve Light:

Mapping: 3D

Width: 20

Height: 20

Blend Mode: Add

Content: [Lumi-Curve](#)
